If the openness factor affects pricing, please submit a question through the Q&A during the open question period. If no questions are submitted, the District will assume that pricing will remain the same regardless of the shade fabric's openness factor.

Bid Pricing for Materials

Line	Product Description	Unit of Measure	Price per Sq. Ft.
1	Manual Roller Shades	Square Foot	$
2	Roller Shades with Remote Control	Square Foot	$
3	Mini Blinds	Square Foot	$

Bid Pricing for Installation: Example Scenario

Purpose:

The District is requesting installation pricing based on a hypothetical project scenario to establish a consistent basis for comparing vendor installation rates. Because installation costs can vary depending on site conditions, mounting surfaces, installation heights, window dimensions, accessibility, and equipment requirements, it is not practical to account for every potential variable in a single pricing schedule.

Vendor Instructions:

The District will provide an example project scenario that includes representative project details and installation requirements. Vendors shall review the scenario and submit a quote for the installation work described.

The quote shall separately identify installation labor, equipment and lift rental (if applicable), travel or mobilization charges, and any other costs associated with completing the example project. Vendors shall clearly identify any assumptions, exclusions, or additional charges that may affect the quoted price.

Use of Pricing:

The example scenario is intended solely to establish a baseline for evaluating and comparing installation pricing among bidders. The scenario is not a guarantee of future project quantities, site conditions, or installation requirements, and the quoted price will not necessarily represent the cost of every future installation.

Actual installation costs may vary depending on the specific requirements and conditions of each project. Vendors should explain any factors that could materially affect installation costs beyond those described in the example scenario.

Product Specifications: Manual Roller Shades

The base bid shall include 37 manually operated roller shades with the following characteristics:

- Shade type: Interior roller shade with a single roller.
- Operation: Manual.
- Fabric: Senscreen with 3% openness.
- Fabric color: Pearl/Grey, or the closest equivalent available if the specified color is discontinued.
- Fascia: 4-inch front fascia.
- Installation: Included in the bid price.
- Quantity: 37 shades, subject to field verification.

Shade Dimensions and Configurations

Configuration	Quantity	Quoted width	Quoted length
Group A	3	60 inches	108 inches
Group B	34	60 inches	60 inches

The dimensions above are reference dimensions for bidding purposes. Vendors are responsible for verifying actual opening sizes, mounting conditions, and finished shade dimensions at the project site.

Bid Pricing

Please complete all applicable fields. Pricing shall include all costs necessary to furnish and install the specified configuration. Vendor is responsible for disposal.

Line	Description	Qty	Width	Length	Price
1	Group A	3	60”	108”	
2	Group B	34	60”	60”	
3	Installation				
4	Additional costs or exclusions, if any (itemize)
